## Research Interest

---

Quantum Computing (Quantum Machine Learning, Quantum Cryptography, Quantum Algorithm), Classical Machine Learning, Optimization

## Education

---

*Bachelor of Science in Computer Science*

*July 2020 – October 2024*

BRAC University, Dhaka, Bangladesh

**CGPA: 3.28/4.0**

**Relevant coursework:** Quantum Computing, Artificial Intelligence, Machine Learning, Image Processing, Natural Language Processing, Blockchain & Cryptocurrencies, Computer Security, Randomized Algorithm, Linear Algebra.

## Technical Skills

---

**Programming Languages:** C, Python

**Quantum Computing Libraries:** Qiskit, Penny-Lane

**Machine Learning Libraries:** TensorFlow, Keras, Scikit-learn

**Tools & Technologies:** Git, LaTeX

## Research

---

- **Audio Classification Using Quantum Techniques.**

*Manuscript under preparation*

- scrutinized the efficiency of hybrid QCNN on audio classification tasks in its NISQ era.

## Projects

---

- **Explainable Detection of Online Sexism** ([Code](#)) ([Report](#))

- TASK A is Binary Sexism Detection: a two-class (or binary) classification where systems have to predict whether a post is sexist or not.
  - TASK B is Category of Sexism: for sexist posts, a four-class classification where systems have to predict one of four categories: (1) threats, (2) derogation, (3) animosity, (4) prejudiced discussions.

- **Signboard Detection Using Deep Learning Based Computer Vision Algorithms**

- **Real-Time Traffic Collision Avoiding Game Using Reinforcement Learning** ([Code](#))

- The goal is to automate playing games by using a trained reinforcement learning model to make judgments and automatically recognize and extract game elements in real time.
  - The game is made by using OpenGL. OpenAI gym is used to build the environment. Proximal Policy Optimization(PPO) is used for training as it performs better than the state-of-art approach.

- **Diabetes Prediction using KNN, Random Forest, and Naive Bayes Classifier** ([Code](#)) ([Report](#))

- **Animating the Lunar Position with Pygame** ([Code](#))

- Some computer graphics algorithms, like the DDA algorithm, midpoint line, and midpoint circle drawing algorithm, are used here.

## Certifications

---

- **Qiskit Global Summer School 2024 - Quantum Excellence** ([Certificate Link](#))

- **Qiskit Global Summer School 2023 - Quantum Excellence** ([Certificate Link](#))

- **Qubit by Qubit's Introduction to Quantum Computing** ([Certificate Link](#))
