Research Interest

Quantum Computing (Quantum Machine Learning, Quantum Cryptography, Quantum Algorithm), Classical Machine Learning, Optimization

Education

Bachelor of Science in Computer Science

July 2020 – October 2024

BRAC University, Dhaka, Bangladesh

CGPA: 3.28/4.0

Relevant coursework: Quantum Computing, Artificial Intelligence, Machine Learning, Image Processing, Natural Language Processing, Blockchain & cryptocurrencies, Computer Security, Randomized Algorithm, Linear Algebra.

Technical Skills

Programming Languages: C, Python

Quantum Computing Libraries: Qiskit, Penny-Lane

Machine Learning Libraries: TensorFlow, Keras, Scikit-learn

Tools & Technologies: Git, LaTeX

Research

- **Audio Classification Using Quantum Techniques.** *Manuscript under preparation*
 - scrutinized the efficiency of hybrid QCNN on audio classification tasks in its NISQ era.

Projects

- **Explainable Detection of Online Sexism** ([Code](#)) ([Report](#))
 - TASK A is Binary Sexism Detection: a two-class (or binary) classification where systems have to predict whether a post is sexist or not sexist.
 - TASK B is Category of Sexism: for sexist posts, a four-class classification where systems have to predict one of four categories: (1) threats, (2) derogation, (3) animosity, (4) prejudiced discussions.
- **Signboard Detection Using Deep Learning Based Computer Vision Algorithms**
- **Real-Time Traffic Collision Avoiding Game Using Reinforcement Learning** ([Code](#))
 - The goal is to automate the process of playing games by using a trained reinforcement learning model to make judgments and automatically recognize and extract game elements in real time.
 - Here the game is made by using OpenGL. OpenAI gym is used for building the environment. Proximal Policy Optimization(PPO) is used for training as it performs better than the state-of-art approach.
- **Diabetes Prediction using KNN, Random Forest, and Naive Bayes Classifier** ([Code](#)) ([Report](#))
- **Animating the Lunar Position with Pygame** ([Code](#))
 - Some computer graphics algorithms, like the DDA algorithm, midpoint line, and midpoint circle drawing algorithm, are used here.

Certifications

- **Qiskit Global Summer School 2024 - Quantum Excellence** ([Certificate Link](#))
- **Qiskit Global Summer School 2023 - Quantum Excellence** ([Certificate Link](#))
- **Qubit by Qubit's Introduction to Quantum Computing** ([Certificate Link](#))
